WORK EXPERIENCE

amasQIS.ai, AI Intern

June, 2025 - Dec, 2025

- Engineered RESTful APIs using Express.js and MongoDB and intuitive front-end user interfaces with React.js and Tailwind CSS, decreasing average page load time by 30% for enhanced UX.
- Implemented key features including JWT-based authentication, routing, and form validation, improving user retention by 25% through a smoother onboarding flow.
- Contributed to 95% of fast deliverables, using Git/GitHub for version control and for task tracking and progress visibility.

SKILLS

- Programming Languages:** Java, Python, C++, JavaScript, TypeScript
- Core Skills:** Data Structures, Algorithms, OOPs, Operating System, Computer Networks
- Web:** React.js, Next.js, Tailwind CSS, Express.js, Node.js, MongoDB, SQL
- Cloud & DevOps:** AWS, Git, Linux/CLI
- Tools:** Git, GitHub, Figma, Postman API, PyCharm, Visual Studio Code

PROJECTS

ReviewPilot - AI-Powered Github PR Review Platform [↗](#)

- Description: An AI-powered Github pull request platform using RAG and Google Gemini AI to generate automated, context-aware code reviews - reducing manual review effort by 60% and improving code quality consistency.
- Key Features:
 - AI Code Reviews: Generated detailed PR feedback (summaries, issues, suggestions) using Gemini AI, improving review efficiency by 55%.
 - RAG Pipeline: Implemented semantic code search with Pinecone, increasing review relevance by 45%.
 - GitHub Automation: Integrated webhooks and APIs from GitHub for real-time PR tracking and auto-commenting.
 - Background Jobs: Built scalable async pipelines for indexing and review generation.
 - Analytics Dashboard: Developed real time activity and usage insights for users.
 - Tech Stack: Next.js, React, TypeScript, PostgreSQL, Prisma, Pinecone, Gemini AI, Tailwind CSS, Inngest, TanStack Query, Better Auth

VOXIDE- Vision Code Editor [↗](#)

- Description: Built a web based code editor that enables hands-free programming using voice input and AI-assisted code generation. Designed end-to-end architecture covering frontend, backend, and real-time communication.
- Key Features:
 - Voice Coding: Designed a voice-to-code processing pipeline converting spoken commands into structured code edits and editor actions.
 - Vision Input: Interpreted screen content for context-aware actions, increasing command accuracy.
 - Live Debugging: Integrated AI-assisted debugging and error explanation for faster issue resolution.
 - Tech Stack: React, TypeScript, Tailwind, SCSS, Node.js, Express, WebSocket, Google Generative AI, Web Audio API

CO-CURRICULAR ACTIVITIES

CloudZone Club, Co-Lead Tech Team

Dec, 2024 - Present

- Led a team of 12+ members and coordinated technical projects and workshops related to cloud computing and emerging technologies. Improved team productivity through effective coordination.

iCreate Club, WebDevelopment Team Member

Nov, 2024 - Present

- Generated 3+ web solutions for club events, enhancing engagement by 40%. Collaborated in a 5-member team to optimize UI/UX, reducing page load time.

CERTIFICATIONS AND ACHIEVEMENTS

- GirlScript Summer Of Code
- Postman API Fundamentals Student Expert
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- 5 Star in Java, Hackerrank
- Completed 100 Days of DSA Challenge
- Solved 280+ problems in LeetCode, specialized in Trees, LinkedList, Array, String, Hash, Sorting

EDUCATION

Bachelor of Technology - Computer Science Engineering

Vellore Institute of Technology

Graduating June, 2027

8.93 CGPA
